Sub-Fund of Fonditalia Fund

Class R (ISIN LU1570311479) / **Class S** (ISIN LU1570311552)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, is a fixed income fund and aims to maximize the total return on investment through a diversified portfolio with a 5 years investment period, starting from 21st April 2017.

Return expectations may differ for investors who will not hold their investment until the end of the Principal Investment Period. The Sub-Fund will seek to achieve its investment objective by investing in a diversified portfolio, primarily consisting of fixed income securities issued by corporations, other non-government issuers, governments and government related issuers located in both developed and emerging markets and denominated in global currencies. The Sub-Fund can invest, up to 100% of the net asset value of the Sub-Fund, in transferable debt securities and/or money market instruments including securities with a rating below "BBB-", or equivalent and above or equal to "CCC" or equivalent, (non-investment grade) or cash represented specifically by bank deposits of credit institutions with a residual maturity date below 12 months.

Up to 40% of the net asset value can be invested in transferable debt securities and/or in money market instruments issued by company or government domiciled in Emerging Markets.

Up to 10% of the net asset value can be invested in UCITS and/or other UCIs that invest in fixed income instruments. The Sub-Fund may invest up to 10% of its net asset value (cumulatively) in Contingent Convertible (CoCos), asset backed securities (ABS) and mortgage backed securities (MBS).

The Sub-Fund will not invest in distressed securities nor in default securities. The maturity date of the debt securities components changes over time, according to investment targets and specific markets development approaching the end of the investment period. After the end of the investment period (i.e. after the 5th year) the Sub-Fund can be invested exclusively in short term transferable debt securities, money market instruments, cash or cash equivalents (composed primarily of bank deposits of credit institutions) each with a residual maturity date of less than 12 months.

Concerning investment in currencies different from Euro, the investment manager will normally use strategies to hedge currency risks.

The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes.

During the Initial Subscription Period (from 1st March 2017 to 20th April 2017) the Sub-Fund will hold 100% of its assets in cash, denominated in Euro.

Investment in the Sub-Fund may be suitable for investors with a medium term investment horizon.

The Sub-Fund has no benchmark.

Higher risk

- This Sub-Fund is classified in the risk and reward category 3 because the investments' value can be subject to limited daily fluctuations, both positive or negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries; price changes may be higher than those in the markets of developed countries.
- **Derivative risk:** In order to achieve its objectives, the Sub-Fund may use derivative instruments whose value may be subject to price fluctuations, positive or negative, much larger than those of the securities in the same Sub-Fund.
- **Counterparty risk:** The Sub-Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the fund itself by not fulfilling their obligations in the future.
