Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, aims to maximize the return on investment during the Principal Investment Period, 5 years starting from 7th November 2017.

The Sub-Fund is suitable for investors who search medium term investments. The investor must be able to accept a certain volatility and the possibility of losing part of the invested amount. The Sub-Fund has been designed for investors who will invest in the Sub-Fund during the Initial Subscription Period and will hold their investment until the end of the Principal Investment Period. Return expectations may differ for investors who will not hold their investment until the end of the Principal Investment Period.

The Sub-Fund seeks to achieve its investment objective during the Principal Investment Period by investing in a diversified portfolio of assets but mainly (between 75% and 100%) by investing in the bond issuances denominated in dollars (USD) of companies, and other non-government issuers, domiciled in emerging market countries (including countries classified as frontier market countries).

The Sub-Fund may invest up to 20% in aggregate in:

- i) equity securities issued in local currencies by companies domiciled in emerging market countries (including countries classified as frontier market countries); and/or
- ii) in units/shares of UCITS and/or undertakings for collective investment ("UCIs") investing in companies domiciled in countries classified as emerging market countries (including countries classified as frontier market countries).

The Sub-Fund may invest up to 10% in bonds issued, in local currencies, by governments and their agencies of emerging market

countries (including countries classified as frontier market countries).

The Sub-Fund can invest between 75% and 100% of the net asset value of the Sub-Fund, in cash represented specifically by bank deposits of credit institutions with a residual maturity date of less than 12 months, in bond type financial instruments and/or money market instruments, including up to 61% of non-investment grade securities with a rating below "BBB-", or equivalent and above or equal to "CCC" or equivalent. The Sub-Fund may invest up to 10% of its net asset value (cumulatively) in Contingent Convertibles (CoCos), in asset backed securities (ABS) and mortgage backed securities (MBS).

The Sub-Fund will not invest in distressed securities nor in default securities. The maturity date of the debt securities held by the Sub-Fund may change over time, according to investment target and specific market developments approaching the end of the Initial Subscription Period.

The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes.

During the Initial Subscription Period (from 15th September 2017 to 6th November 2017) the Sub-Fund will hold 100% of its assets in cash, denominated in Euro. The Sub-Fund has no benchmark.

This Sub-Fund has two Unit-Classes: Class R and S.

Class R is a capitalization Unit-Classes. With reference to the Unit-Class S, the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus of the Fund.

You may request to redeem the units held at any moment, by sending a request on any business day.

Potential lower reward

Higher risk

Potential higher reward

- This Sub-Fund is classified in the risk and reward category 3 because the investments' value can be subject to limited daily fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfill its commitments with a negative impact on the securities' price.
- Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries; price changes may be higher than those in the markets of developed countries.
- Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
